

What is F⁴ESL?

F⁴ESL is an integrated online training programme on EU food safety regulations ensuring vocational education for stakeholders of food chain via newest learning methods. It is going to be piloted across all European countries in 2 sessions, in 2011. Each session lasts two months. First session starts on January and finishes at the end of the February, 2011

EU authorities address the "farm-to-fork" approach by giving priority to consumer demand and the right to access to safe and high quality food. To achieve this, an efficient and effective food control system along the food chain should be established and implemented. At this point, Food Safety Legislation becomes very important to obtain food safety.

Five European member countries and a candidate country participated in this project to share their knowledge and experiences on food safety legislation and e-learning technology. To reward their endeavor the EU decided to fund the project through the Lifelong Learning Program (LLP) "Leonardo da Vinci" (2009-1- TR1-LEO05-08647).

Why F⁴ESL is needed?

- o Safe Food is a Human Right!
- o Awareness of all stakeholders in food chain
- o Lack of knowledge on food safety legislation
- o Pro-activity
- o Effective control
- o Legislations are difficult to understand
- o E-learning applications are practical and efficient way of learning

What is the main aim of F⁴ESL?

F⁴ESL aims to fill the gap in Food Safety Legislation Training based on from farm to fork concept

What is the curriculum?

The training program will be developed by a Pan European committee of top professionals as to bring about a state of the art curriculum which consists of 5 modules:

- Module 1: Introduction
- Module 2: Legislation on product
- Module 3: Legislation on process
- Module 4: Labeling
- Module 5: Public Powers

What are the expected results?

- Digital version of the e-learning courses
- EU Food Safety Legislation Content
- F⁴ESL web environment
- Need Analysis Results
- Project quality management handbook/ Users guide /Instructor guide
- 50 trainees from each partner country, min 250 in total
- Dissemination materials (flyers, posters etc)
- Information seminars

Transferred Project

SK/01/B/F/PP-142 243

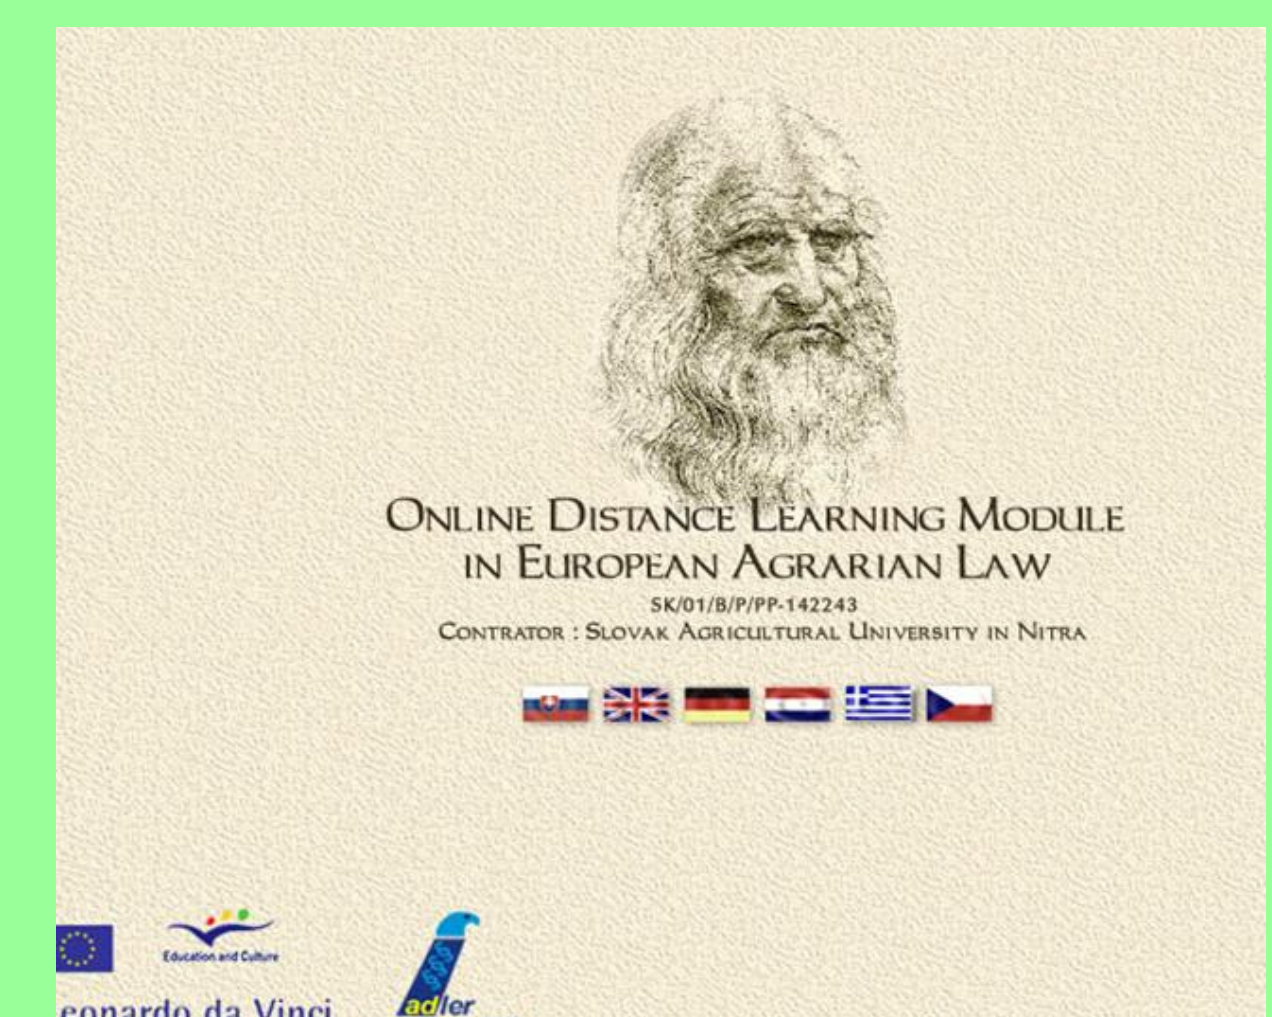

Online Distance Learning Module in European Agrarian Law

Coordinator: The Slovak University of Agriculture in Nitra

Partner countries: Slovakia, Czech Republic, Germany, Great Britain, Greece, and The Netherlands

The target group: managers in agriculture

Main fundamental is the quality of Agrarian Law in the EU

Project Work Packages

- WP1. Project Management and Coordination
- WP2. Need Analysis and Pedagogical Structure
- WP3. System Analysis and Design
- WP4. F⁴ESL Content Development
- WP5. Implementation of F⁴ESL
- WP6. Pilot Courses
- WP7. Evaluation
- WP8. Dissemination and Valorization

Target Groups

- Food producers and processors
- Official controllers/inspectors
- Members of unions, chambers and associations related with food and food safety
- Local bodies
- Importers & Exporters
- University and graduate students from relevant departments

PARTNERSHIP

- Kalite Sistem Laboratories Group, TURKEY
- Slovak University of Agriculture, SLOVAKIA
- Instituto Tecnológico Agrario de Castilla y León, SPAIN
- Office-Fr Business Consulting, TURKEY
- Turkish Food Safety Association, TURKEY
- Accent Consulting Ltd., BULGARIA

- Sistem Quality Management, TURKEY
- Ministry of Agriculture and Rural Affairs, TURKEY
- Food and Veterinary Service, LATVIA
- Food Employers' Union of Turkey, TURKEY
- Turkish Food Importers Association, TURKEY
